

Project Summary

Advancing Mathematics Performance 2 (AMP2), a collaboration between Hillsborough County Public Schools, Pinellas County Schools, and the University of South Florida impacted more than 785 3rd grade gifted students.

The project was implemented in 2 phases: Phase I provided 50 3rd grade gifted education teachers in Hillsborough and Pinellas school districts with interactive online professional development and coaching for an advanced mathematics curriculum targeting number and operation skills aligned with the Florida Standards. Phase II of the project opened the training to teachers of gifted students throughout Florida school districts.

The goals of the project were to improve teaching practices and increase academic performance of gifted students in mathematics. Outcomes included a redesign of 3rd grade gifted mathematics instructional practice and improved content knowledge of students.

The project coordinators were Dr. Lauri Kirsch, Hillsborough County Public Schools and Jenny Klimis, Pinellas County Schools. Dr. Elizabeth Shaunessy-Dedrick, University of South Florida, served as a consultant for the development of the AMP2 teacher training.

Funding for the project was provided by a Florida Department of Education Collaborative Curriculum Challenge Grant.
