

Co-teaching Strategies to Promote Differentiation and Engagement

Rebecca (Becky) Eckert, PhD - Rebecca.Eckert@uconn.edu
University of Connecticut

Co-teaching Definition (Friend & Cook, 2006): Two (or more) educators share instructional responsibility and mutually agreed-upon goals for a single group of students. The teachers have mutual ownership, pooled resources, and joint accountability, though individual teacher's roles may vary.

"By co-teaching with others, teachers transcend the experience of isolation" (Tobin & Roth, 2005, p. 314).

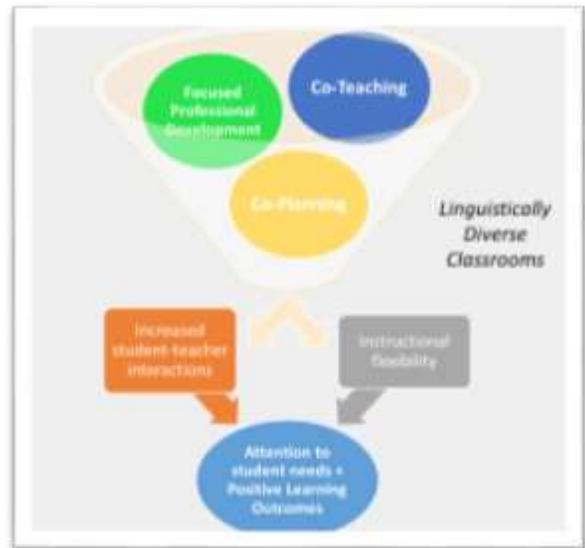

Who can participate in a co-teaching team?

- Teachers
- Student teachers & interns
- Tutors
- Para-professionals
- Specialists

There are many possible configurations. All you need is two or more caring adults committed to working together regularly to benefit a group of students.

How do students and teachers benefit from purposefully implementing co-teaching?

- Positive student outcomes (academic & social)
- Increased instructional flexibility
- Increased student-teacher interactions
- More positive working environments

Co-teaching requires building trust and comfort

"Part of the co-teaching dynamics is learning how to co-teach with someone else right? **Classrooms are like a bedroom—our private space**—even though they're public places for kids. At the end of the day, teachers become very protective of their own space. And I think this allows for practice in the area of engaging with another adult about best practices in the classroom with kids." ~LB, Elementary Principal~

Co-teaching requires and promotes innovation

"It's two people working in one classroom and **you have to be open to each other's ideas, thoughts, and opinions**. There's some things we have to go back and discuss because I thought one thing and you thought another...and **we discussed it together**." ~HA, K Co-teacher~

Co-teaching promotes reflective practice to support professional growth and student learning

"[T]here is a difference and it's because of that reflection piece that is happening between the adults in the room. Right? Because when you teach alone there's no one else to say how you did, or say 'Oh I heard you say this, and we talked about using this term instead....' **It is a safe space**, there isn't someone coming in evaluating you, **this is someone that you're working with**." ~L.B., Elementary Principal~

"It definitely **makes you look at your own instruction**, too. Because now you have to explain what you're doing, why you're doing it, and then you have to talk about your assessment of your group after every time: were your students getting it? What were they saying?" ~SG & AL, Gr. 4 Co-teachers~

Tips and Tricks of Co-teaching:

- ❖ **Set aside the time to plan**
 - For co-teaching to run effectively teachers need time to meet, collaborate, and decide how the lesson will run, this avoids confusing during the lesson and allows for quality instruction.
 - Side Note: This step becomes easier as co-teachers become more familiar with each other and each teaching style.
- ❖ **Take the time to reflect on each practice**
 - Not every model of co-teaching works every single time or with every group of students. Reflecting on what made a particular lesson work is helpful for planning in the future.
- ❖ **Use your resources**
 - Both co-teachers come with a variety of expertise and resources, do not be afraid to admit that you need help locating a resource. In addition, sharing is caring, share resources to maximize instruction!
- ❖ **Compare assessment data**
 - Both teachers should have a reasonable understanding of where the students are at academically before, during, and after students are in the lesson. One co-teacher might catch something the other might have missed.
- ❖ **Try each co-teaching model a few times**
 - Give each model multiple tries in a variety of settings to see which works best for the class.
- ❖ **Be open and honest to new approaches**
 - Being open-minded helps facilitate co-teaching and collaboration in a meaningful way. In addition, it can help you further your practice.
- ❖ **Don't be afraid to challenge each other's thinking**
 - It is okay to as a faculty member to explain why they are teaching something in a certain way, as long as it is done in a respectful manner. This gives co-teachers a chance to reflect on their own practice, as well as a chance to understand new pedagogies.
- ❖ **Actually practice how a lesson will run**
 - Although time consuming, mapping out how you will interact with one another helps avoid some 'glitches' of co-teaching
- ❖ **Have fun!**
 - So often teaching can take place in isolation, co-teaching gives teachers a chance to share experiences and maximize their resources.

Thank you to Kimberly Graumnitz and Alison Labaire for this thoughtful advice!
