

Curriculum Compacting Activity Instructions

The curriculum compacting activity resources include a grade 3 math test, an answer key to the grade 3 math test, and seven student-completed tests.

The mission of your team is to:

1. Identify the competencies being assessed for mastery on the pre-test.
2. Create a curriculum compacting table in which the pre-identified skills from the pre-test are listed horizontally across the top and each student's name is listed vertically down the left-hand side.

Sarah									
John									
Liza									
Angel									
Rachel									
Sam									
Alan									

3. Assess each student's test.
4. Enter each student's information into the table that you created for curriculum compacting.
5. Determine if and how will you modify the course material for each student.
6. Take a screen shot or photo of your table to share with the larger group.
7. Choose a spokesperson to communicate the following:
 - a. What competencies did you identify in the pre-test?
 - b. How will you modify for the curriculum for each individual student?
